ARC CONSULTING

# Replace **355** non-contactless cards expiring April through December 2027 for **$2,840**

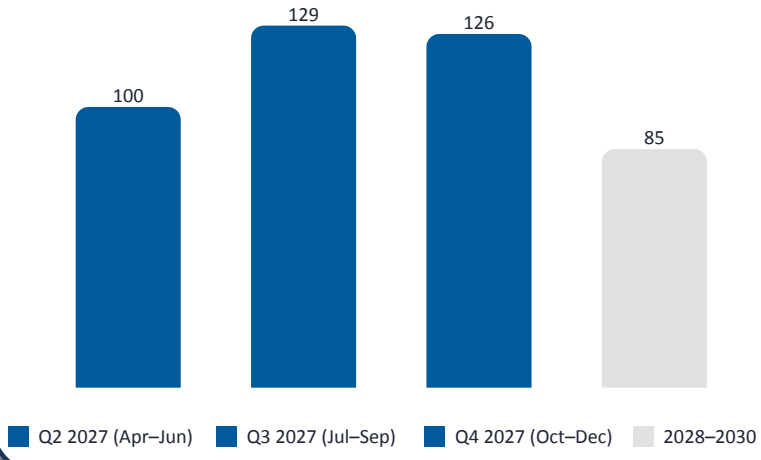

## What to do with each group

- 1,253 cards: no action needed. They'll get contactless cards on their normal replacement schedule.
- **355 cards: replace early.** These expire April through December 2027 and make up 80.68% of the 440 cards that won't renew on schedule.
- 85 cards: wait. They don't expire until 2028–2030.

### Only 355 of 1,693 non-contactless cards need early replacement

### Three quarters of 2027 hold 355 of the 440 cards

## Bottom line

The 1,253 non-contactless cards expiring in the next six months will get contactless replacements on their normal schedule, so the early batch should start after that. Replacing the **355 cards** that expire April through December 2027 covers 80.68% of the remaining 440 for **$2,840.**

**355 cards × $8 per card = $2,840**
Replacing all 1,693 non-contactless cards: 1,693 × $8 = $13,544
**$10,704 saved** by letting 1,338 cards renew on schedule or wait
